Message sent	Tue 7/15/2025 11:17 AM

---

Join us for a training on using AI in higher education work to improve quality and increase productivity. This training will be presented by Jarrod Humphrey who is using AI in our work on the design and development of a new course on AI for the Williams College of Business. Jarrod also leads a more comprehensive training at the Xavier Leadership Center called [Artifical Intelligence \(AI\) in Business](#).
